MILTON ROY

MACROY® SERIES

The **MacRoy® Series** of metering pumps offer traditional Milton Roy reliability with outstanding value for applications up to 175 psi (12 Bar).

Milton Roy has combined its heavy-duty industrial drive technology with state of the art design and manufacturing processes in creating the **MacRoy® Series** metering pump. This family of **Mechanically Actuated Diaphragm** metering pumps is designed for durability and cost effectiveness.

Illustrated to the right is a D4 with a PVC liquid end, featuring NPT connections.

MACROY FEATURES AND SPECIFICATIONS

- Flow Rates up to 312 GPH (1180 Liters/hr)
- Mechanically Actuated Diaphragm liquid end eliminates flow restrictions
- Durable, metallic housing designed to withstand tough environments
- High efficiency motors minimize heat buildup
- A robust, metallic, worm gear drive coupled with the industrial duty variable eccentric stroke adjustment mechanism yields a 10 to 1 turn down ratio with smooth velocity profiles as compared to the pulsating flows of solenoid pumps or lost motion designs
- Smooth running, low friction bronze gears
- The PTFE, high performance, diaphragm design increases diaphragm life by eliminating the stresses inherent in most designs
- Reliable low flow performance is a result of high performance check valves with machined seats
- All gear components operate in an oil bath for long life
- Precision stroke adjustment can be operated while the pump is running or stopped
- Steady State Accuracy — $\pm 1\%$ of full capacity over the 10 to 1 turndown ratio
- Liquid Temperature Range — 14° to 122° F (-14° to 50° C)
- Coating — 2 part epoxy
- Average Weight — Frame D: 45 lbs (20 kgs)
Frame G: 105 lbs (48 kgs)

MACROY, DEPENDABLE AND VERSATILE

The MacRoy™ series of pumps has proven its exceptional value over years of solid performance in a wide range of applications and industries. Water treatment chemicals, process additives, acids, out-gassing fluids, slurries, and many more applications are all handled with ease by this robust metering pump design. Your local representative can assist you in applying the MacRoy™ metering pump to your process.

ACCESSORIES

Safety Valves

Protect pump and piping from overpressure.

Back Pressure Valves

Provide smooth, artificial pressure in pump discharge line for atmospheric or low pressure systems to ensure pumping accuracy.

Pulsation Dampeners

Minimize pressure and flow surges in the pump discharge. When applied to pump inlet, more favorable NPSH conditions result.

Calibration Columns

Allow periodic verification of pump performance during routine checks or after system maintenance.
